

Oracle headroom decomposition

Opportunity is not recoverability.

$$H_{oracle} = R_0 - R_\theta = H_{obs}(m) + G_{id}(m)$$

$H_{obs}(m) = R_0 - R_m$
observable value

$G_{id}(m) = R_m - R_\theta$
identification gap

R_0

R_m

R_θ

T-002: the gold segment can equal the entire bar even when oracle headroom is positive.
